Experience

Full stack & mobile developer, UI/UX designer

Anden Solutions | February 2023 - Present

I have successfully contributed to over 15 projects, demonstrating my expertise in both frontend and backend development. My primary strengths include:

- **Frontend Development:** Mainly using React and React Native, and styling with Tailwind and Sass.
- **Backend Development:** Experienced in building robust backend systems using C#.
- **Database Management:** Skilled in SQL databases, particularly SQL Server and PostgreSQL.
- **UI/UX Design:** Competent in UI/UX design using Figma.

Key Responsibilities and Achievements:

- **Agile Methodologies:** Actively participated in Scrum and Kanban processes.
- **Architectural Design:** Contributed to the architectural design of several projects, including those utilizing microservices architecture.
- **Client Interaction:** Engaged directly with numerous clients, always in English, to gather requirements and provide technical support.
- **ETL Development:** Developed ETL tools for data migration.
- **CMS Configuration:** Configured websites using CMS technologies.

Developer and Systems Analyst

Control Global | April 2021 - May 2023

I held a key role in the development of mobile applications, contributing to the company's success in delivering high-quality software solutions. My responsibilities and achievements include:

- **Mobile Development:** Developed mobile applications using both native Android and .NET MAUI. Successfully published several applications on the Play Store and App Store.
- **Backend Development:** Contributed to backend development using C#.
- **Database Management:** Designed SQL Server databases, ensuring robust and efficient data management.
- **Functional Analysis:** Participated in the functional analysis of multiple systems, identifying and documenting requirements to guide the development process.
- **UI/UX Design:** Made significant contributions to UI/UX design.
- **Agile Methodologies:** Worked within a hybrid agile framework, blending Scrum and Kanban methodologies.
- **Deployment and Configuration:** Played a key role in systems design and configuration, taking care of deployments across different environments.
